PIVOT
Series

Improve Health

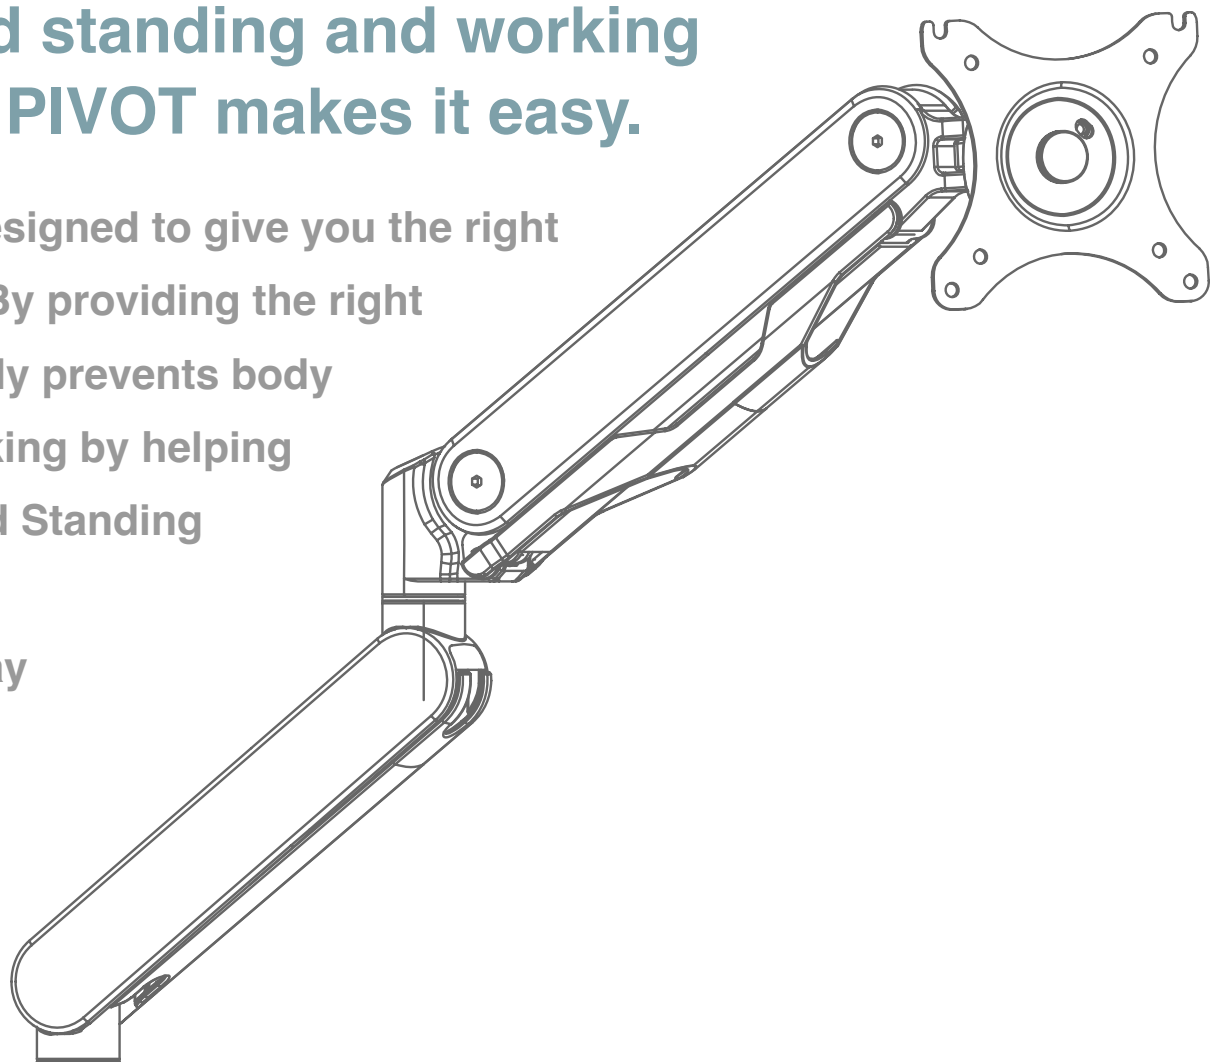

Increase Productivity

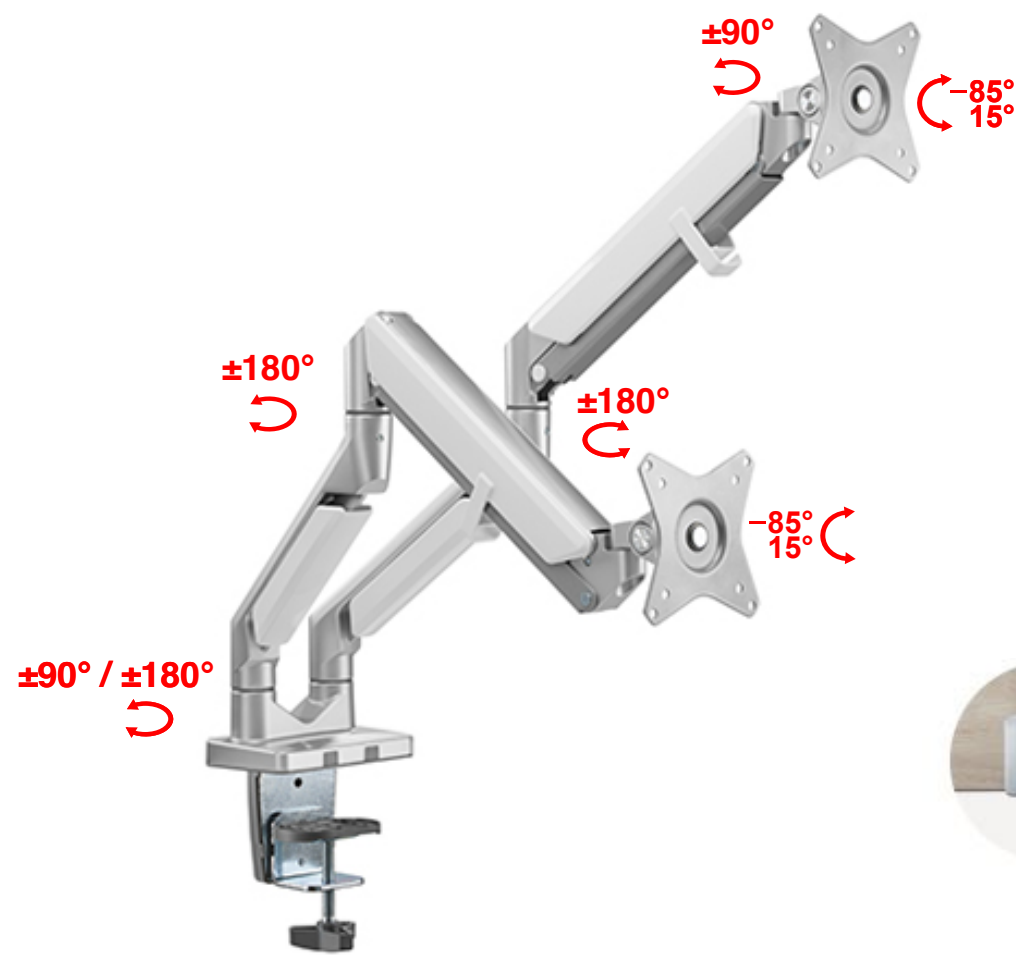

Health experts recommend standing and working 15-30 minutes every hour. PIVOT makes it easy.

The PIVOT Series of Monitor Arms is designed to give you the right ergonomic posture for all day working. By providing the right alignment and working height, it not only prevents body fatigue, but also promotes healthy working by helping you alternate easily between Sitting and Standing working postures.

Concealed Wire Management takes away messy wires and improves real estate on your work desk. This helps in focused working and increased productivity in a clutter-free environment.

About

The PIVOT Gas Spring Monitor Arm moves the user into a new era of viewing comfort and positioning ease. The “Apple-like” aluminum finish pleases the eye while adding a soft yet modern touch to most any décor. PIVOT has ability to move monitors with little to no effort and the quality-tested internal gas spring mechanism firmly holds the monitor in place once in position. The unique side-by-side base arm design increases the possibilities to move the arms to include accommodating shared areas or to simultaneously position monitors in landscape and portrait in a nearly seamless arrangement. Finally, a built-in 180 degrees rotation stop prevents the arm from entering rear desk space, perfect for adjoining desks and cubicles. The PIVOT monitor arm is the perfect choice for users looking for solid performance and design.

- Detachable VESA Plate Design: enables easy installation
- Gas spring perfectly counterbalances the weight of your screen to help effortless adjustment for viewing comfort
- Built-in Spring Tension Mechanism: for perfect weight adjustments
- 180° Rotation Stop: prevents monitor arm from swinging into screens or walls
- Non-skid Silicone Pads: protect work surface from scratches or scuffs
